To Whom It May Concern:

Re: Western Petroleum Management Ltd.

International Sovereign Energy Corp. employed Western Petroleum Management Ltd. throughout 2006 and 2007 to manage all facets of field operations for International Sovereign in the western Canadian basin. Management included all preliminary drilling planning, regulatory approvals, drilling services attainment, drilling operations and well completion operations. The activity involved some twenty different projects in western Canada with heavy, light oil and gas projects. Western Petroleum also was instrumental in equipping wells with surface facilities, which enabled commercial sales for both gas and oil.

Western Petroleum Management has displayed good leadership skills in project management, technical competency and an ability to get the job done in a cost effective manner. I can personally recommend the services of Western Petroleum Management Ltd.

David Quinn
Vice President, Operations
International Sovereign Energy Corp.
