To whom it may concern,

RE: Western Petroleum Management (WPM)

Western Petroleum Management Ltd has provided project management services for Korea National Oil Corporation's oil sands operations in N.E. Alberta since 2006. WPM has supplied excellent services including management of all operations related to surveying, OSE application, construction/reclamation of access roads and coring locations, and all aspects of drilling, coring and proper disposal of drilling waste fluids. The WPM team were very diligent and paid particular detail to regulatory, safety, environmental, project cost control and technical issues. This ensured that our winter drilling campaign(s) were completed on time and under budget which is commendable given the historical inflationary conditions and lack of experienced personnel that have been observed within the heavy oil industry in Western Canada. Awarding project management contract(s) to WPM was the right decision for our company.

I would personally recommend the services that Western Petroleum Management can provide to the Oil & Gas Industry and in particular the oil sands industry.

Sincerely,

Brian Kwak

Operation Manager
